Fishlake National Forest
Attn: Diane Freeman
South Fork Vegetation Treatment Project Team Leader
115 East 900 North, Richfield, UT 84701

Dear Ms. Freeman:

The Beaver County Commission has reviewed the proposed action for the South Fork Vegetation Treatment Project. We commend the Forest Service in actively protecting the health of the forest. Beaver County is extremely concerned about the fuels build up, the high tree densities, and the spruce beetle infestation on the Fishlake National Forest. We are especially concerned where these dangerous situations occur near private properties. Thus, the Beaver County Commission fully supports the proposed action.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Will Dalton', is written over a light, circular watermark of the Beaver County seal.

William L. Dalton, Chairman
Beaver County Commission
